PROFILE

Full Stack Developer with **2+ years of hands-on experience** in designing, developing, and maintaining scalable web applications using **Java, Spring Boot, React.js, Angular, TypeScript, Python, and modern web technologies**. Experienced in building **REST APIs, GraphQL APIs, responsive user interfaces, database-driven applications, authentication and authorization systems, and third-party integrations**. Strong understanding of **SDLC, Agile methodology, debugging, performance optimization, API development, and clean coding practices**. Skilled in developing secure, scalable, and maintainable applications while collaborating effectively across the software development lifecycle. Passionate about delivering **efficient, reliable, and user-focused software solutions**.

WORK EXPERIENCE

Full Stack Developer — Nandalala Infotech

October 2024 – Present

- Developed and maintained scalable web applications using **React.js, Angular, Next.js, TypeScript, Java, and Spring Boot**.
- Designed and implemented **REST APIs, GraphQL APIs, and backend services** for application workflows.
- Built **responsive UI components**, integrated frontend-backend communication, and improved user experience.
- Worked with **MySQL, MongoDB, and PostgreSQL** for database design, optimization, and data management.
- Implemented **JWT authentication, API integrations, debugging, and production-level enhancements**.
- Collaborated with cross-functional teams in an **Agile Scrum environment** for feature development and delivery.

Key Achievements

- Delivered applications across **Healthcare, Recruitment, Billing, and Business domains**.
- Improved code quality through **reusable components and optimized application architecture**.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Frontend: HTML5, CSS3, Bootstrap 5, Tailwind CSS, Angular, React.js, TypeScript

Backend: Spring Boot, Spring MVC, Flask, REST APIs, GraphQL, JWT Authentication

Databases: MySQL, MongoDB, SQL Server

Authentication & Security: JWT Authentication, Role-Based Access Control

Tools & DevOps: Git, GitHub, Docker, Azure DevOps, Postman, CI/CD

Concepts: OOP, MVC Architecture, Database Design, Responsive Design, Agile Scrum, SDLC

PROFESSIONAL PROJECTS

Local Dentist – Healthcare Appointment Booking System

Tech Stack: React.js, TypeScript, NestJS, GraphQL, Hasura, PostgreSQL

- Developed a **location-based healthcare booking platform** connecting patients with nearby dental clinics.
- Implemented separate workflows for **Patient and Clinic users** with **role-based access**.
- Built features for **clinic listing, profile management, availability, and appointment scheduling**.
- Developed and integrated **GraphQL APIs** using NestJS and Hasura.
- Created **responsive React.js components** and optimized database operations.

Lala Invoice – Invoice & Billing Management System

Tech Stack: React.js, Flask, MongoDB

- Developed a **billing and invoice management system** for handling business transactions.
- Built reusable **React.js components** for customer, product, and invoice management.
- Developed **Flask REST APIs** for business logic and application communication.
- Designed and managed **MongoDB collections** for invoice and customer data.
- Implemented **invoice generation and tracking workflows**.

EMS (Enterprise Management System) – Ship Equipment Tracking System

Tech Stack: Angular, Spring Boot, MySQL

- Developed a **container and ship equipment tracking system** for shipment operations.
- Built Angular-based **tracking dashboards** to monitor equipment and shipment details.
- Developed **Spring Boot REST APIs** for managing application data.
- Implemented **container status tracking, equipment records, and maintenance updates**.
- Optimized **MySQL database operations** for efficient data management.

PERSONAL PROJECTS

AI Chatbot Application

Tech Stack: Python, Flask

- Developed an AI-powered chatbot for natural language interaction.
- Implemented **intent recognition and conversational workflows**.
- Built REST-based communication between frontend and backend.

Fake Profile Identification Using Machine Learning & NLP

Tech Stack: Python, Machine Learning, NLP, Scikit-Learn

- Developed a machine learning model to identify fake social media profiles.
- Applied **TF-IDF feature extraction** for text classification.
- Implemented **Naive Bayes, SVM, and KNN algorithms**.
- Achieved approximately **85% classification accuracy**.
